A heavy-duty metal casting and adhesive system which prevents theft of computers, printers, fax machines and other expensive office equipment.

Multi-purpose design allows the adaptation to a wide variety of office equipment.

High strength adhesive mat with up to 20,000 lbs of adhesive strength.

Can be removed without damaging the work surface.
(To relocate the CPU you will require a replacement plate).

Technical Specification

SECURITY WITHOUT DRILLING

FLS are able to offer an alternative method of securing equipment using AnchorPad Security Systems.

These Systems use the tried and tested AnchorPad sticky pad, a method which does not involve drilling office furniture.

They can be used to secure computers, printers, faxes and other valuable equipment.

These products are offered at very competitive prices which includes delivery and installation.

Available for both desktop and tower CPUs.
