

SILVERMARK SECURITY LABELS

These labels are in fact also stencils which are applied to your valuable equipment.

Your name and other details, including sequential numbering, are precision cut into the label material and then 'painted' with UV ink.

The stencil labels are made from a special material which cannot be removed in one piece and it will break into small pieces if removal is attempted.

Even if the label is forcibly removed the text will glow if viewed under a UV lamp, as used by the police, to identify your property.

A new way to help fight crime; these labels are in fact stencils which are applied to your valuable equipment. Your name and other details, including sequential numbering, are precision cut by laser into the material and then painted with UV ink.

The stencil labels are made from a special material which CANNOT be removed in one piece and it will break into small pieces if removal is attempted. Even if the label is forcibly removed the text will glow visible if viewed under an UV lamp, as used by the police, to identify your property.

Stencils precision cut with your own details, including sequential numbering. UV ink and a UV light is included with each order.

These stencils are suitable for all equipment with a 'shiny' surface such as laptops, projectors, cameras, mobiles, bikes, garden utilities - where chemical etching won't penetrate.
