

UNIVERSAL PROJECTOR ENCASEMENT

The Universal Projector Encasement is designed to accept the majority of projectors which are on sale today.

The encasement will mount on to any FLS or Unicol ceiling mount.

The projector is placed into the encasement in whichever position best suits the lens, ventilation or control pattern configurations. When the position is decided, the encasement can be mounted onto the ceiling fixing with any side becoming the side facing the screen or smartboard.

The encasement is designed to allow the projector to be suspended within the encasement or positioned on the bottom, in whatever is the best position for the projector.

The projector secures into the encasement by two locking bars which are locked by two radial locks.

Technical Specifications

Construction Plate and Pole

Constructed from 2 mm sheet steel.

Lock and Locking Bars

Two Locking Bars made from 5 mm steel secured by two tamper proof radial lock, which can be keyed different or keyed alike across a range of units.

Suspension Bar Bars

Two suspension bars constructed from 2 mm sheet steel with four rows of pre-punched holes to facilitate fixing to projector.

Universal Encasement

The Universal Encasement can be used with the projector suspended or sited on the encasement bottom. The projector can be enclosed within the encasement in any position or orientation.

Finish

Powder coated to colour of your specification.

Projector Sizes

The Encasement is universal so all models can be secured.

Previous Installations

Universal encasement can also be retro-fitted onto any previous FLS or Unicol fitting
